

OZONE RETROFIT FOR BOTTLED WATER

Air-Cooled Ozone Systems

- Easy to install
- Works in existing control and PLC environments
- Air-cooled, wall mount and floor cabinets
- No cooling water required
- Saves energy, ultra energy efficient
- Sizes to fit any flow requirements
- Rental ozone systems available

SGA and NSGA Series available in 12 models to fit any bottled water ozone requirement

Retrofit Packages to Optimize Existing Ozone Installations

Replace your old ozone generator with advanced, powerful, energy-efficient ozone equipment and superior technical support from Pacific Ozone. Saving water and energy means saving money. The SGA and NSGA Series air-cooled systems will save up to 400,000 gallons of water per year for each ozone generator compared to a typical water-cooled system. Significant energy savings are achieved from its high concentration ozone output and ultra-efficient control capabilities. And it eliminates the additional cost of a cooling unit and associated maintenance costs.

Bottled Water Benefits:

- Upgrades save water, time, energy and money
- Bolts into existing systems
- Technical Support for all applications
